

# FLUID HANDLING & ELECTRICAL SOLUTIONS

**AGI Industries**  
*An Employee Owned Company*

[WWW.AGIINDUSTRIES.COM](http://WWW.AGIINDUSTRIES.COM)

## HISTORY OF AGI INDUSTRIES

AGI Industries, Inc. is an industrial fluid handling products distributor, systems packager and specialty pump manufacturer founded in 1963 when founder Albert L. George decided to design and build a new line of hydraulic tongs for the oil and gas industry. While the project never developed, Albert found the local marketplace eager for fluid power products and technical expertise in the application of those products.

In 1968 the company name changed from George Equipment & Engineering Company to Al George Incorporated. The company then expanded to include pump distribution, packaged pump systems and the manufacturing of high pressure triplex pumps and related components. The company formally became AGI Industries in 1998. Today AGI Industries consists of three divisions, AGI Industries, AGI Packaged Pump Systems, and Hydroplex. AGI has also expanded to include: valve and valve automation products; flow, level, temperature and pressure measurement; vapor and flame controls and long term storage and preservation products.

In 2004 the principal shareholders established an Employee Stock Ownership Plan (ESOP) allowing the ownership of the company to transition to the employees, making each employee a stakeholder in the growth and success of the company.

## MISSION STATEMENT - WHAT WE DO

The Company provides quality fluid handling solutions to a diverse clientele. Our passion, expertise, and commitment to excellence results in world-class products and unparalleled customer service and support. We measure success by delivering exceptional value and exceeding our partners' expectations.

## VALUES

Values are the key principles for guiding behavior and decisions in your company. Articulated values help people in your company know what to do and what is expected of them.

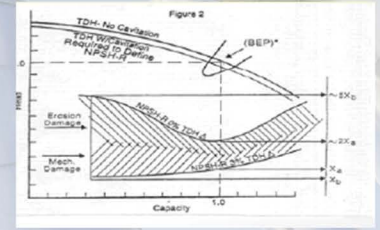

- **Safety First** – In every decision consider safety first; safety is our number one concern. Safety is our consideration of others and their well-being.
- **Proactive Customer Service** – Responsive to clients both inside and outside of the corporation, we want to be known to all as a company that acts with diligence, timeliness, and deliberation.
- **Integrity** – To be upright in our actions; honest with our words and deeds; faithful to God; impartial with our application of principles; trustworthy with what we see, touch, and act on; speak truth in all things; and offer respect to all.
- **Quality Minded** – Is both an attitude of pride in the work that we perform and commitment to the quality programs and processes necessary to measure and assure that we perform within those expectations.
- **Teamwork** – There's nothing we do that's an individual effort. We must always seek to collaborate and support each other's work for the betterment of our Company, our customers, and our suppliers surrounded by an encouraging and enjoyable environment.

## AGI Industries, Inc. - A "Solutions First" Equipment and Services Provider

AGI Industries is home to a vast array of experienced and creative fluid handling product, system and market experts, possessing the ability to solve the toughest challenges facing the market place today. From proper system design to diagnosing and mitigating equipment problems, AGI Industries brings knowledge, experience and premier distributed products to its clientele.

### REAcT - AGI ROTATING EQUIPMENT ACTION TEAM

AGI Rotating Equipment Action Team – AGI Industries has assembled some of the best, brightest and most experienced in the industry to diagnose and fix pump and system problems. Using both internal competency and that of our manufacturing partners and selected subcontractors we are able to diagnose and make recommendations on pump, seal, piping, control, or almost any problem related to fluid handling or movement. This is done by flow, pressure, temperature & vibration monitoring, system analysis, NPSH calculations, Field Performance Testing, Motor Circuit Testing, and Mechanical Seal Failure Analysis.

### How Do We Do It?

- ▶ Flow, Pressure, Temperature and Vibration Monitoring
- ▶ System Analysis
- ▶ NPSH Calculations
- ▶ Field Performance Testing
- ▶ Motor Circuit Testing
- ▶ Mechanical Seal Failure Analysis

## PUMPS

AGI Industries represents a complete range of pumps and related products including centrifugal pumps, chemical metering pumps, and positive displacement pumps. Additionally AGI offers accessories from leading manufacturers to service the onshore and offshore Oil & Gas Industry, the Chemical Process and Hydrocarbon Process industries, Power Generation, Pulp, Paper and Wood Products Industries and most other markets where fluid must be removed reliably.

### CENTRIFUGAL PUMPS

- ANSI
- Sump
- Vertical Turbine
- API 610
- Multistage
- Submersible
- General Industrial

### CHEMICAL METERING PUMPS

- Plunger
- Diaphragm
- Electric
- Pneumatic
- Solar

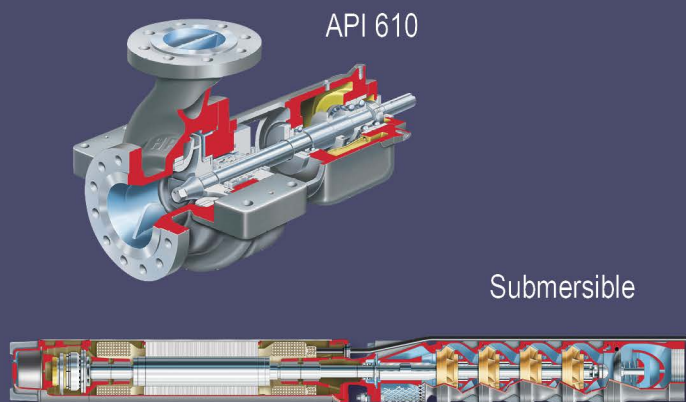

### POSITIVE DISPLACEMENT PUMPS

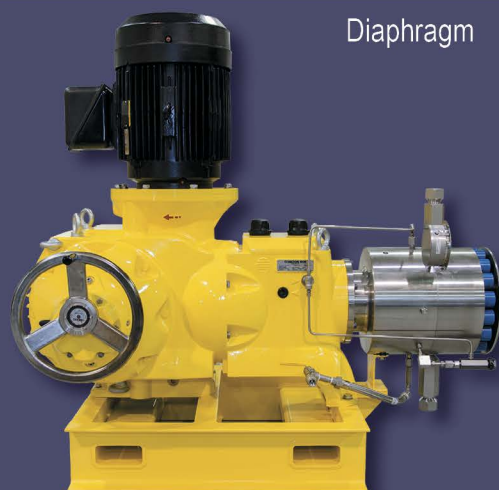

- Plunger
- Rotary Gear
- Piston
- Screw
- Progressive Cavity
- Sliding Vane
- Diaphragm
- Peristaltic

## MEASUREMENT & CONTROL

AGI Industries represents a full array of measurement and control products to meet your valve automation, level, flow, pressure, and temperature measurement, vapor and flame control and gas/liquid metering needs. We also design and fabricate turnkey skids for injection wells, test headers, meter runs, chemical injection, L.A.C.T.'s, and other packaged systems.

- Valve Automation
- Flow Rate & Pressure Control
- Level Measurement & Control
- Liquid & Gas Tracking
- Vapor & Flame Control

## ACCESSORIES & RELATED PRODUCTS

AGI Industries represents pump accessories and related equipment from industry leading manufacturers. AGI has product specialists to assist you in selection, pricing and application of these products along with trained field service technicians.

- Mechanical Seals
- Suction & Pulsation Dampening/Surge Control
- Side Entry Mixers
- Lubrication Systems
- Chemical Gauging Equipment
- Couplings
- Corrosion Protection & Preservation
- And much much more....

Hydroplex Corporation has been developing, designing and manufacturing fluid handling products since 1980. A manufacturer of high pressure pumps as well as valves and accessories for Oil and Gas customers worldwide, Hydroplex is on the leading edge of the ever increasing need for higher pressure injection and testing pump equipment.

## HIGH PRESSURE PUMPS

Hydroplex high pressure pumps are designed, built, and tested in Lafayette, Louisiana, serving the Oil & Gas and General Industrial service sectors with rugged, compact models from 40 to 250 horsepower. With flow capabilities from 1/4 gpm to 1 barrel per minute, Hydroplex pumps are well suited for hydrostatic testing, well equalizing, B.O.P. charging systems, well slugging, batch treatment, and chemical and methanol injection jobs up to 30,000 psi. Ongoing research and development on our test stand ensures that Hydroplex Corporation can duplicate in-field pumping conditions, and continuously improve our products. Hydroplex Pumps are a product of AGI Industries, Inc. with ten offices in Louisiana, Texas and New Mexico. Along with AGI Industries, Hydroplex offers complete, customized pump packages designed, fabricated, and tested to your specifications.

## CHOKE VALVES BY HYDROPLEX

Hydroplex chokes are Multi Orifice Valves (MOV) specifically designed to control high pressure liquids and gases while providing reliability and extended service. The body and control surfaces are constructed to provide optimum meantime between service, and the modular construction makes the valve easily serviceable on site or completely repairable with minimal down time. The design flexibility also allows for field conversions from manual to automated, and single stage to multiple stage pressure drops. The optional wear sleeve is designed to direct the flow from the Multi Orifice discs to the centerline of the piping and is made from abrasion resistant Stellite material. This option will extend the life of the valve by reducing the effects of cavitation and mechanical erosion typically present in the fluid recovery process after the pressure drop.

- Control of All Types of Well Fluids
- Multi-Orifice Trim for Low Pressure Recovery
- Valve Can Be Fitted with Multiple Stage Inserts for High Pressure Reduction
- Fully Supported Stem & Trim. No Vibration or Unstable Control Element
- Simple Low Cost Inline Maintenance
- Comprehensive Interchangeable Parts System
- High Flow Capacity

## SERVICE & REPAIR

AGI Industries has factory authorized and certified service and repair centers in most branch locations. Supported by local parts inventory, repairs are completed to factory, ANSI or API standards and can be customized per customer's written request. Other services include:

- Field Services - Offshore/Onshore/International
- Laser Alignment
- Clean Room - for final assembly
- Quality Assurance - inspection with documentation
- Hydro-Testing of pump rebuilds & seal installation with test results
- Pump Grouting & Installation
- Hydraulic Pump Repair & System Inspection
- Start-Up Services
- System Analysis
- Trouble shooting
- Root Cause Failure Analysis
- NPSH Analysis
- Short/Long Term Preservation
- Indoor Storage

## AGI Packaged Pump Systems

*A Subsidiary of AGI Industries*

AGI Package Pump Systems specializes in chemical injection, pipeline and pipeline pigging, salt water disposal, well equalization, fluid transfer, process packages, potable water and wash-down systems as well as many other custom packaged units. Utilizing the latest in 3D AutoCad design software AGI PPS can give you confidence in the design and delivery of your custom system. Found in the US, Angola, Brazil, Canada, Chad, Columbia, Ecuador, Egypt, Indonesia, India, Mexico, Nigeria, Trinidad, Russia, Vietnam and many other countries across the globe, AGI PPS delivers consistent high quality performance products to the international Oil and Gas market.

### CAPABILITIES

- Skilled estimating, project management and engineering teams
- Packages up to 45' x 22' and up to 130,000 lbs.
- Welding – structural, piping and alloys including 17-4 SS, 316 SS, 316 L, Super Duplex, Aluminum, 4130, and Carbon Steel, and orbital welding of 2507 tubing
- Electric, engine and turbine packages to 5000 HP
- Designed and fabricated packages with pressures to 20,000 PSI
- On-site testing and flow measurement
- International field service
- Comprehensive HS&E program
- Compliant with ISO standard 9001:2015; ISO 1401 and ISO 1801
- Compliant with API RP 76
- And much more
