

AGI Industries

FLUID HANDLING SOLUTIONS

1963

George Equipment & Engineering was founded.

1968

George Equipment & Engineering became Al George Inc.

1998

Al George Inc. expanded their scope and became AGI Industries.

2004

AGI Industries became an established ESOP company.

AGI Industries
An Employee Owned Company

OUR HISTORY

AGI Industries, Inc. is an industrial gas and fluid handling products distributor, systems packager and specialty pump and valve manufacturer founded in 1963 when founder Albert L. George decided to design and build a new line of hydraulic tongs for the oil and gas industry. While the project never developed, Albert found the local marketplace eager for fluid power products and technical expertise in the application of those products.

In 1968 the company name changed from George Equipment & Engineering Company to Al George Incorporated. The company then expanded to include pump distribution, packaged pump systems and the manufacturing of high pressure triplex pumps and related components. The company formally became AGI Industries in 1998. Today AGI Industries consists of three divisions, AGI Industries, AGI Packaged Pump Systems, and Hydroplex. AGI has also expanded to include: valve and valve automation products; flow, level, temperature and pressure measurement; vapor and flame controls and long term storage and preservation products.

In 2004 the principal shareholders established an Employee Stock Ownership Plan (ESOP) allowing the ownership of the company to transition to the employees, making each employee a stakeholder in the growth and success of the company.

OUR MISSION

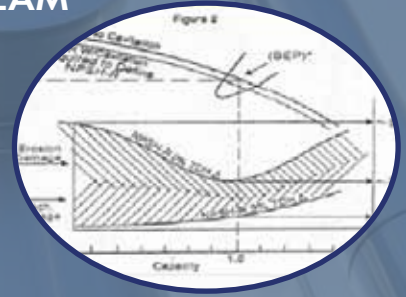

The Company provides quality gas and fluid handling solutions to a diverse clientele. Our passion, expertise, and commitment to excellence results in world-class products and unparalleled customer service and support. We measure success by delivering exceptional value and exceeding our partners' expectations.

OUR VALUES

- **SAFETY FIRST** – In every decision consider safety first; safety is our number one concern. Safety is our consideration of others and their well-being.
- **PROACTIVE CUSTOMER SERVICE** – Responsive to clients both inside and outside of the corporation, we want to be known to all as a company that acts with diligence, timeliness, and deliberation.
- **INTEGRITY** – To be upright in our actions; honest with our words and deeds; faithful to God; impartial with our application of principles; trustworthy with what we see, touch, and act on; speak truth in all things; and offer respect to all.
- **QUALITY MINDED** – Is both an attitude of pride in the work that we perform and commitment to the quality programs and processes necessary to measure and assure that we perform within those expectations.
- **TEAMWORK** – There's nothing we do that's an individual effort. We must always seek to collaborate and support each other's work for the betterment of our Company, our customers, and our suppliers surrounded by an encouraging and enjoyable environment.

REAcT

AGI ROTATING EQUIPMENT ACTION TEAM

AGI Industries has assembled some of the best, brightest, and most experienced in the industry to diagnose and fix pump, compression, and system problems. Using both internal competency and that of our manufacturing partners and selected subcontractors we are able to diagnose and make recommendations on pump, compressor, seal, piping, control, or almost any problem related to gas and fluid handling or movement. This is done by flow, pressure, temperature & vibration monitoring, system analysis, NPSH calculations, Field Performance Testing, Motor Circuit Testing, and Mechanical Seal Failure Analysis.

How Do We Do It?

- Flow, Pressure, Temperature & Vibration Monitoring
- System Analysis
- NPSH Calculations
- Field Performance Testing
- Mechanical Seal Failure Analysis

SERVICE & REPAIR

AGI Industries has factory authorized and certified service & repair centers in most branch locations. Supported by local parts inventory, repairs are completed to factory or API standards and can be customized per customer's written request.

Other services include:

- Field Services: Offshore/Onshore/International
- Laser Alignment
- Quality Assurance: inspection & documentation
- Hydro-Testing of pump rebuilds & seal installation with test results
- Pump Grouting & Installation
- Hydraulic Pump Repair & System Inspection
- Start-Up Services
- System Analysis
- Trouble Shooting
- Root Cause Failure Analysis
- NPSH Analysis
- Short/Long Term Preservation
- Indoor Storage

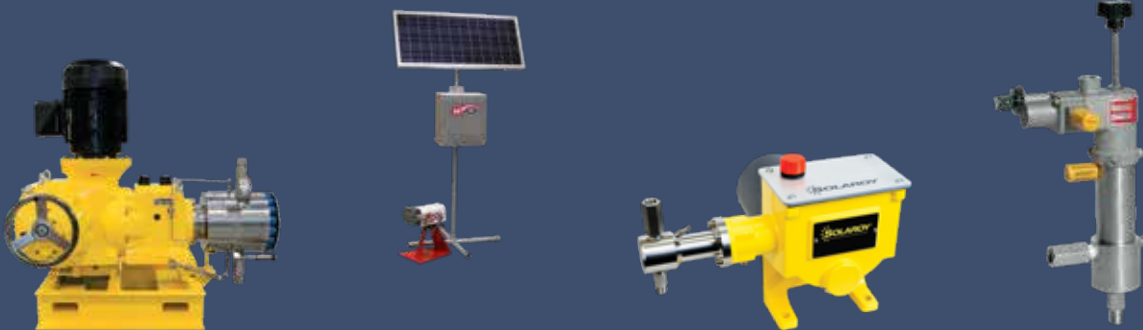

PUMPS

AGI Industries represents a complete range of pumps and related products including centrifugal pumps, chemical metering pumps, and positive displacement pumps. Additionally AGI offers accessories from leading manufacturers to service the onshore and offshore Oil & Gas Industry, the Chemical Process & Hydrocarbon Process Industries, Power Generation, Pulp, Paper & Wood Products Industries and most other markets where fluid must be moved reliably.

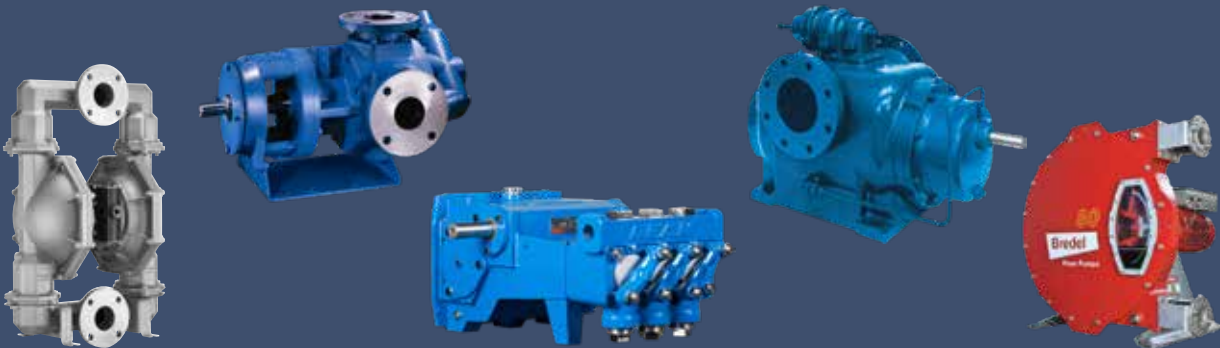

CENTRIFUGAL

- ANSI
- Sump
- Vertical Turbine
- API 610
- Multistage
- Submersible
- General Industrial

CHEMICAL

- Plunger
- Diaphragm
- Electric
- Pneumatic
- Solar

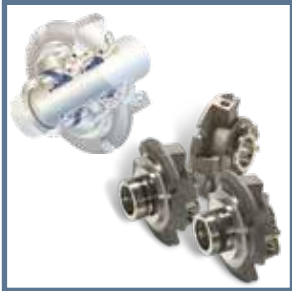

POSITIVE DISPLACEMENT

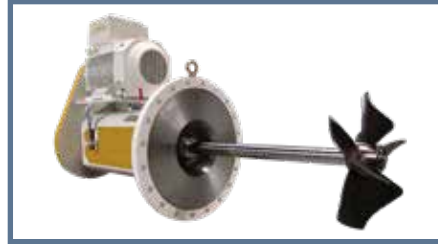

- Plunger
- Rotary Gear
- Piston
- Screw
- Progressive Cavity
- Sliding Vane
- Diaphragm
- Peristaltic
- Rotary Piston

ACCESSORIES & RELATED PRODUCTS

AGI Industries represents pump accessories and related equipment from industry leading manufacturers. We have product specialists to assist you in selection, pricing, and application of these products along with trained field service technicians.

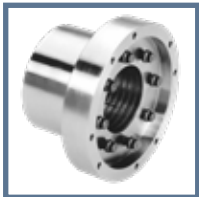

Mechanical Seals

Side Entry Mixers

Suction & Pulsation Dampening/ Surge Control

Couplings

Corrosion & Preservation

Chemical Storage Tanks

VACUUM & COMPRESSION

AGI Packaged Pump Systems builds vacuum & compression units for both traditional Oil & Gas locations as well as Renewable Natural Gas (RNG), and Biogas applications. These packages can be equipped with natural gas engines, electric drives, or any other drive preference. Auto speed control and VFDs maintain the efficient trending of compression rates required, basis the vapor stream pressure encountered. Our systems units encompass the use of latest technology PLC controls ensuring the highest level of automation, control, and safety, resulting in the highest level of protection for the operations personnel and equipment.

2 Stage Rotary Vane Vapor Recovery Unit

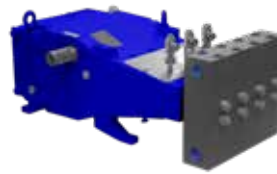

Biofuel Vapor Recovery

Since 1980 Hydroplex Corporation has manufactured a line of innovative and rugged high-pressure triplex pumps, valves, and accessories to serve the Oil & Gas and General Industrial service sectors. Hydroplex products are custom engineered, built and tested in Lafayette, Louisiana, USA for your applications. We are committed to understanding the critical nature of our client's efforts and supporting those efforts with quality products, inventory and technical support they can count on.

HIGH PRESSURE PUMPS

Hydroplex high pressure pumps are designed, built, and tested in Lafayette, Louisiana, with rugged, compact models from 40 to 250 hp. With Flow capabilities from 1/4 gpm to 1 bpm, Hydroplex pumps are well suited for hydrostatic testing, well equalizing, B.O.P. charging systems, well slugging, batch treatment, and chemical and methanol injection jobs up to 30,000 psi. Ongoing research and development on our test stand ensures that Hydroplex Corporation can duplicate in-field pumping conditions, and continuously improve our products. Along with AGI Industries, Hydroplex offers complete and customized pump packages designed, fabricated, and tested to your specifications.

HYDRA THROTTLE VALVES

Hydroplex Hydra series throttle valves are Multi Orifice Valves (MOV) specifically designed to control high pressure liquids and gases while providing reliability and extended service. The Hydra throttle valve's innovative modular design means that the valve body is not sacrificed during normal service, thanks to the replaceable downstream hub on some models. Most models allow for multiple stage pressure drops within ONE valve. The design flexibility allows for conversions from manual to automated and altering of pressure drops in the field for most models. Our HCA, HCY, CSX, MiniMax, and HydraMax models allow for direct mounting of most female drive actuators with NO need for brackets or couplings.

AGI Packaged Pump Systems

A Subsidiary of AGI Industries, Inc.

AGI Package Pump Systems specializes in chemical injection, pipeline and pipeline pigging, salt water disposal, well equalization, fluid transfer, process packages, potable water and wash-down systems as well as many other custom packaged units. Utilizing the latest in 3D AutoCAD design software AGI PPS can provide confidence in the design and delivery of your custom system. Found in the US, Angola, Brazil, Canada, Chad, Columbia, Ecuador, Egypt, Indonesia, India, Mexico, Nigeria, Trinidad, Russia, Vietnam and many other countries across the globe, AGI PPS delivers consistent high quality performance products to the national and international Oil and Gas market.

OUR CAPABILITIES

- Skilled estimating, project management, and engineering teams.
- Packages up to 45' x 22' and up to 130,000 lbs.
- Welding – structural, piping and alloys including 17-4 SS, 316 SS, 316 L, Super Duplex, Aluminum, 4130, and Carbon Steel; and orbital welding of 2507 tubing
- Electric, engine, and turbine packages up to 5000 hp.
- Designed and fabricated packages with pressures up to 20,000 psi.
- On-site testing and flow measurement.
- International field service.
- Comprehensive HS&E program.
- Compliant with ISO standard 9001:2015; ISO 1401, and ISO 1801.
- Compliant with API RP 76.
- ...And much more

"SOLUTIONS FIRST" EQUIPMENT & SERVICES PROVIDER

AGI Industries is home to a vast array of experienced and creative gas and fluid handling product, system and market experts, possessing the ability to solve the toughest challenges facing the marketplace today. From proper system design to diagnosing and mitigating equipment problems, AGI Industries brings knowledge, experience and premier distributed products to its clientele.
